SUMMARY

React.js developer with over three years of experience, I specialize in React, Redux, JavaScript, and frontend technologies. I am proficient in state management, performance optimization, and mentoring junior team members.

EXPERIENCE

Frontend Developer

[Tata Consultancy Services](#)

📅 11/2020 - Present 📍 Indore, India

Worked on the development of a browser-based application using React.js resulting in a 20% increase in user engagement.
Responsible for designing and maintaining company's web properties.

- Was responsible for mentoring, day-to-day supervision of 3 front-end developers
- Engineered a complete UI/UX overhaul using React that streamlined navigation and improved user engagement, which decreased the website's bounce rate by 40% within the first quarter post-implementation.
- Reduced page load time on 10 client websites by 30% through a number of optimization techniques.
- Collaborated with cross-functional teams to ensure timely delivery of project milestones.
- Debugged and resolved application issues to improve user experience.
- Collaborated with clients to gather requirements and provide technical solutions resulting in a 100% satisfaction rate.

PROJECTS

BhopaliFood

🔗 <https://github.com/kushagra331/BhopaliFood>

Building a fast, scalable, and functional React application for a food ordering website. Used the Swiggy Public API to fetch data. It is Single Page Application (SPA) featuring a multi-page experience with Home, Menu page, and Cart page.

- Used Swiggy API for retrieval of restaurants data.
- Adding/removing and clearing cart using Redux.
- Displaying Restaurant list, menu page and having search functionality Shimmer UI, infinite loading on the Home Page
- Tech Stack : React.js, React-Router, Redux, Babel, Parcel, Javascript, JSX, Tailwind CSS

Enhanced Youtube

🔗 <https://github.com/kushagra331/Enhanced-Youtube>

A clone of YouTube website with routing and API integration. It has features like watching videos, related videos and a search bar. It also displays relevant video data such as views, likes, and comments. Used hooks such as useState and useEffect to manage state and render data dynamically.

- TechStack : Tailwind CSS, React JS, React Redux, Javascript , React Router
